

HISENSE HOME CARE APPLIANCES NOVELTIES ON IFA 2024 PR

HOME CARE NOVELTIES ON IFA 2024

Agile in motion. Stylish in design. Reliable in performance. Hisense products are all about innovative technology. And it's technology that impacts our senses. What it brings us is the FEELING of well-being, comfort, safety, and mastery.

In today's fast-paced world, maintaining a clean and fresh environment is essential for our health and well-being. With tasks demanding efficiency, cleaning shouldn't be an exception.

That's why we've harnessed all our expertise to introduce the technologically superior solution. Meet them on IFA 2024.

1. CORDLESS VACUUM CLEANERS WITH INVERTER TECHNOLOGY

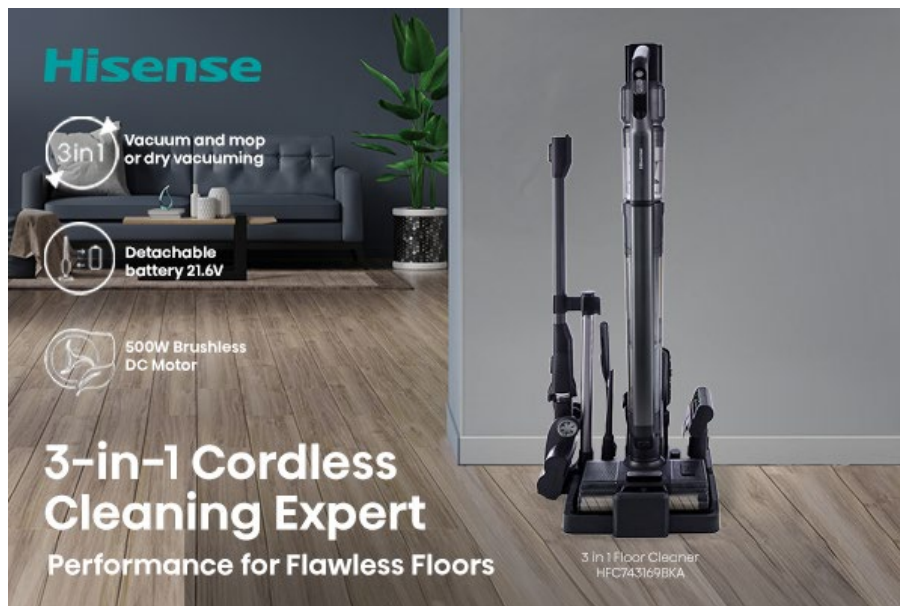

Inverter technology allows you to adjust the power of the appliance according to the needs or possibilities of use. Thanks to more precise power regulation, the appliance is more efficient, more durable and reliable, works longer and is more energy efficient. The user can enjoy in quieter operation, more precise power adjustment, an extended motor lifespan, and improved suction control.

2. WET & DRY EXPERTS

Offering the ultimate cleaning experience, it not only swiftly ensures your floors are impeccably clean and dry but also revolutionizes the way you tackle spills and messes with its

wet cleaning capabilities. Cordless and powerful, equipped with an efficient two soft roll brushes which rotates in opposite directions, and HydroGuard Filtration System, along with other user-friendly features, it boasts a myriad of technological solutions designed to elevate your cleaning experience.

3. ROBOT VACUUM CLEANER WITH EXTREME SUCTION POWER

A smart and elegant vacuum cleaner with special mop technology addition will help you get your hands off annoying tasks at home such as cleaning floor and making your space spotless. Once set up, it will do almost all the work of cleaning, which can give you more time to do the things you love. If you haven't considered buying a robotic vacuum cleaner yet, here you might find some reasons to buy it, after all.

We upgraded the existing model with more power. 8 kPa is not the power you will see on the market easily. The robot is controlled with smart APP, ConnectLife Small domestic appliances and features 2 step intelligent cleaning, vacuuming & mopping, many cleaning modalities (selected rooms, area, one by one, zigzag, deep cleaning...), 30 sets of sensors, E-controlled water tank, smart charging, carpet detection, floating roller brush, and powerful battery.

4. SPOT CLEANER

Spot cleaner with steam function and powerful power pressure for deep cleaning. It is versatile, suitable for home with children and pets, for allergy sufferers, for busy professionals... It ensures a deep and thorough clean, enhancing household hygiene and convenience.
